Restoring Saltland to Productive Pastures Sundowner

Come along for an informative look at great results being seen on Keley's large scale manuring trial on barley grass, samphire and scalded areas.

Utilising specialised perennials accompanied with varying amounts of manure some great results are being seen on creating a VALUABLE grazing system out of salt pan area.

Following viewing the trial, at the sheds Dr Dean Revell will offer insight into a variety of methods being used for similar sites followed by discussion over drinks and light refreshment

Dr Dean Revell – Revell Science
20 years industry experience in production systems & animal nutrition.

When: Tuesday 11th Oct – 1pm – late afternoon

Where: Bus from WWLZ office- can stop in Woodanilling to pick up – alternatively meet at Paul & Linley Keley's property – 720 Coomelberrup Rd Katanning
