

How even is your fertiliser spread pattern?

Did you know that the majority of fertiliser spreaders deliver highly variable spread patterns? This compromises production rates and farm profitability as some areas within the paddock receive too much fertiliser and others too little. Understanding your spreader pattern using different products can result in higher productivity and healthier waterways.

Join Australia's leading Accu-Spread trainer Russell Nichol, who will be sharing his knowledge and demonstrating how to test and calibrate fertiliser spreading equipment.

AccuSpread Field Day

Date: 9am Thursday 13 June 2019

Location: 134 Wilcox Rd, Narrikup (Oyster Harbour Catchment)

Register: Bruce Radys, 0428 994 048

bruce.radys@ohcg.org.au or via website www.ohcg.org.au

Lunch is provided so please register and provide dietary requirements
